Pickleball

Pickleball is a fun sport, like tennis and ping-pong combined. Players use paddles to hit a hard ball with holes, making it less bouncy. The game is played on a court, which is smaller than a tennis court. Matches can have two or four players who hit the ball back and forth over a net. Pickleball got its name from a racing boat called the pickle boat, which has a mixed crew, just like the mix of sports in pickleball.

Power Nappers

A study in 2023 looked at how chinstrap penguins sleep. Unlike humans, they take many short naps instead of one long sleep. Scientists studied 14 penguins and found they nap thousands of times a day, totaling over 11 hours of sleep. These quick rests might help keep penguins safe while taking care of their eggs.
